INFORMATION

Introduction

- Sports and games generate massive amounts of data, most of which is still waiting to be understood. UWAGGS exists to gather University of Waterloo students, staff, faculty, and members of the wider sports analytics community at large to grow the presences of the quantitative analysis and applications of analytics to games and sports.
- Whether you live and breathe sports or you're just excited by what real-world data science can uncover, you'll find your people here. We're a place to build real skills, work on meaningful projects, and connect with others who take this stuff seriously, regardless of where you're starting from.

Introduction

- Founded in 2023, UWAGGS exists to bridge the gap between classroom theory and applied data science in the sports industry, e-sports, and beyond. Whether you're a seasoned coder or just getting started, we can provide the resources, collaboration, and exposure to help you grow.
- Projects in our group span the full spectrum of sports and games. From athlete performance and player tracking to fantasy sports, prediction markets, game theory and more, if there's a corner of sports that draws your curiosity, there's probably a place for it here.

Some recent UWAGGS

Sports Analytics at a Glance

- Almost every professional sports organization has an analytics-adjacent department, and this is even permeating its way down to the semi-professional and collegiate leagues as well, including [here at UW](#)
- There are [over 50](#) university sports analytics clubs across North America, including several within Ontario
 - Examples: [QSAO](#), [UTSPAN](#), [YSAC](#), [WSAC](#)
- There has also been a rapid expansion of sports analytics in the public domain, with a growing presence in academic journals
 - Examples: [JQAS](#), [JSA](#), [JSE](#), [JJPAS](#)
- Even with its growth, the space is very intimate and networking occurs quite naturally. The community is very open and friendly!

Photos of execs and all that

UWAGGS Executive Team

Club Goals

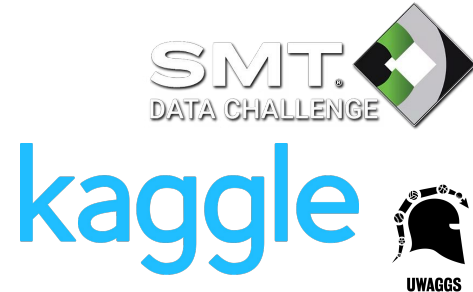

1. Form teams and collaborate on projects, data challenges, and competitions
2. Share resources for tutorials and workshops to enhance our breadth of applied data science in sport
3. Attend seminars from members of the sports analytics community
4. Present research at and attend conferences

Competitions

- Participating in competitions is an excellent way to improve your technical skills, bolster your portfolio, and collaborate with like-minded peers
- To stay up to date with information and relevant deadlines, follow along the **#competitions** channel in our [Discord](#) or the **competitions** page on our [website](#)

click on an icon to learn more!

Conferences

- Sports conferences are a great opportunity for students to showcase their projects, grow their knowledge, and network with industry professionals
 - Many conferences include data competitions tailored specifically for students
- To stay up to date with information and relevant deadlines, follow along the **#conferences** channel in our [Discord](#) or the **conferences** page on our [website](#)
 - Most faculties (i.e. [Math](#)) at UW help sponsor costs for students presenting their work. See the **funding-opportunities** thread for pertinent links & further information

Resources, Tutorials, and Workshops

- Applied data science (and sports analytics in particular) has a wealth of open-source resources and accessible skill-building opportunities
- We encourage members to share relevant materials in the [#resources](#) channel of our [Discord](#)
 - Looking for data or resources for a project? Send a message in a sport-specific channel!

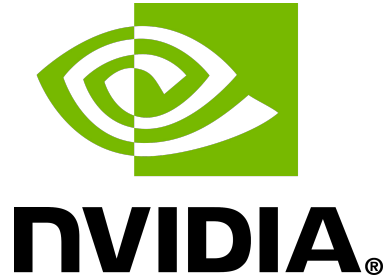

Job Opportunities

- Sports analytics jobs are increasing in popularity, outpaced by a growing number of talented and passionate applicants. We are committed to helping members develop the skills necessary to become competitive candidates
- We encourage members to share relevant opportunities in the **#sports-jobs** channel in our [Discord](#), as well as [advice](#) on resumes and applications
 - Please let us know if you get hired in the sports industry so that we can celebrate you!

Some places where UWAGGS members have worked!

Sessions

- UWAGGS sessions consist of presentations, tutorials, and show 'n tells
- Recordings (where available) and supplementary material can be found on the **sessions** page our [website](#) and on our [GitHub](#) page. Examples include:
 - [Project Show 'n Tell](#)
 - [Sports Data Visualization](#)
 - [Monte Carlo Simulation in Cricket](#)
 - [Bayesian Modelling of Horse Racing Outcomes](#)
 - [Fantasy Baseball Correlations](#)
 - [E-Sports Analytics](#)
 - [Continuous Win Probability Modelling in Lacrosse](#)
 - [Starcraft II Regression Modelling](#)

Projects

We encourage members to share their work in the [#projects](#) channel in our [Discord](#), and we'll add it to the [projects](#) page on our [website](#) for added visibility! Examples include:

- [NBA Player Cards](#)
- [upsortsR](#) and [usportspy](#)
- [CPU Powerlifting Analytics](#)
- [Clustering SHL Teams Using Offensive Zone Metrics](#)
- [Triple Crown Motocross - 2024 Report](#)
- [It's Not My Fault: a Balanced Perspective on Stolen Bases](#)
- [PGA Tour Practice Optimizer](#)
- [Forechecking Pressure Topology](#)
- [NHL Rivalries](#)
- [WR-Only Separation \(WOS\)](#)

Collaboration

- We encourage members looking for people to collaborate with on a project to send a message in the **#collaborations** channel in our [Discord](#)!
- UWAGGS hosts regular “Builder Sessions” where members can work on their projects and receive feedback from their peers and experienced execs
- For select competitions, UWAGGS helps create teams by circulating interest forms that gauge the previous experience, technical competence, and time capacity of prospective participants and match members accordingly

UWAGGS Term Sign-In Form

Please fill out the term sign-in form! UWAGGS does not charge member fees
